

Wild Rhino is a campaign with the objective of reducing the illegal demand of rhino horn in Vietnam. The campaign is a partnership initiative with schools and the business community of Ho Chi Minh City, Vietnam. It is implemented in association with Wilderness Foundation Africa, Peace Parks Foundation, Soul Music & Performing Arts Academy and the Olsen Animal Trust.

Our World

This is our world. There's only one like it and we share our world with millions of animals but there are so many of them that are threatened by human greed, false beliefs and damage to the environment. But it's not too late, something can be done about it...

Are you ready to become a hero like Rhino Ranger? Let the fun begin by coloring in Rhino Ranger so that he can guide you through the wilderness activities!

Did you know

When animals are extinct, it means that there are no more of them left in the world.

The Javan Rhino became extinct in 2010 in Vietnam and the West African Black Rhino in Africa became extinct in 2011. The last male Northern White Rhino in Africa died in 2018.

We've got to come together to stop this from happening!

Will you help me?

Spot the difference

Can you spot the differences in the two wilderness pictures? Circle the differences. Can you think why they are missing? Once you have solved the mystery we can dive into the next activity... Ready? Let's go!

Colour by number and see what damage
we are doing to the ocean.

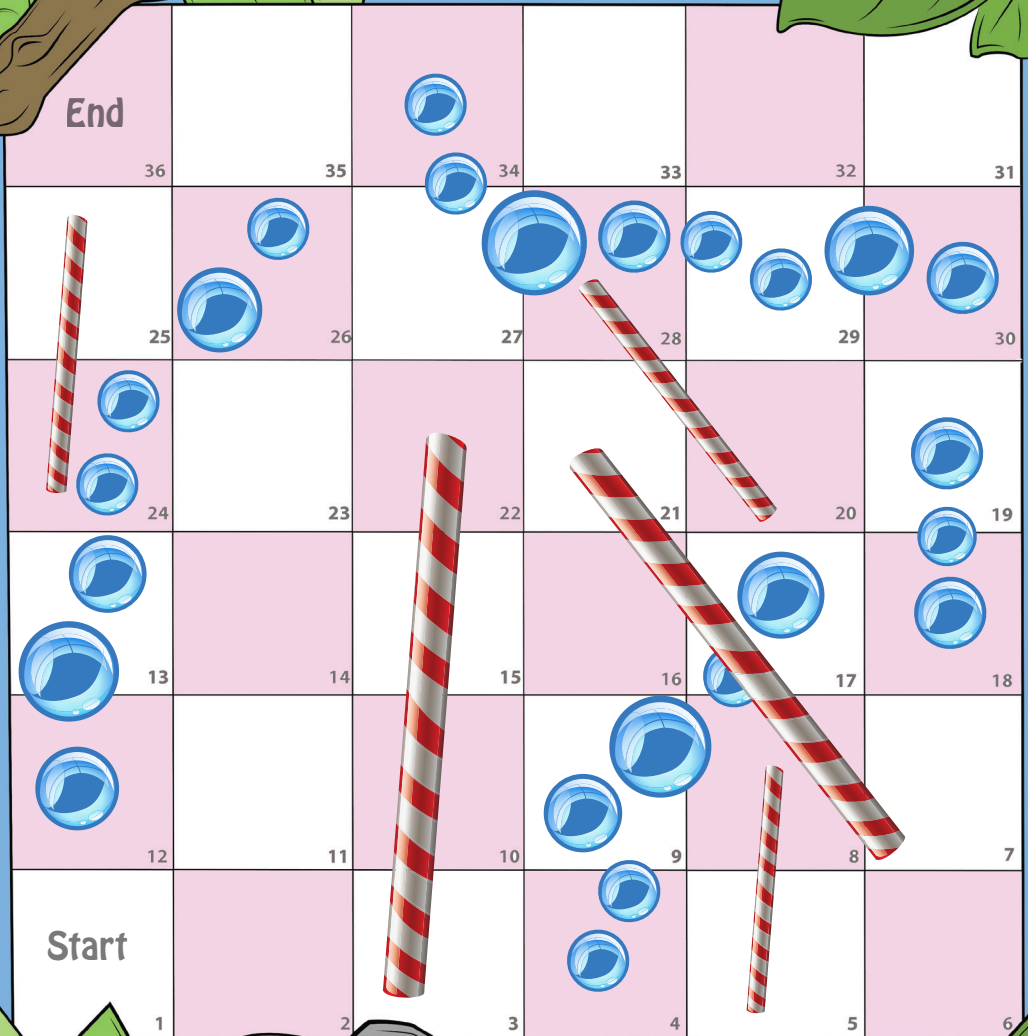

Did you know

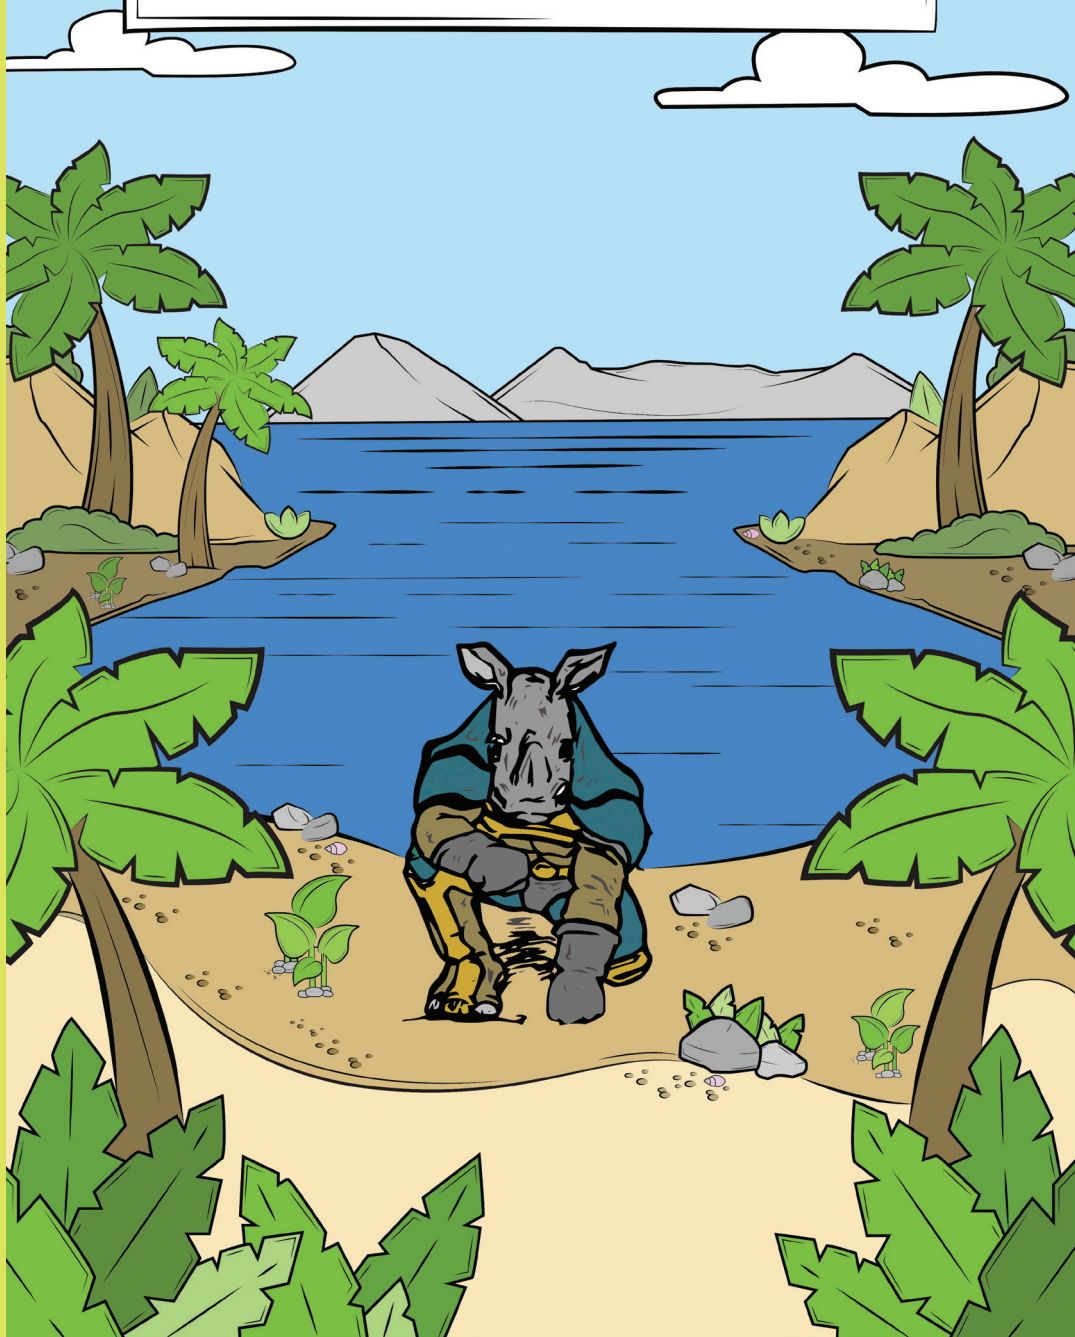

There is a huge trash island in the Pacific Ocean called the Great Pacific Garbage Patch that is four times bigger than Vietnam.

Straws and Bubbles

Lets have some fun! Swim your way to the top by rolling the dice for the number of moves you can make. Look out for the plastic straws, you will have to move down the straws and start from where they end. If you land on the bubbles, follow them up and continue to play.

Now that we know how dangerous plastic is for our ocean friends it's time to see what's happening on land. Are you ready? Here we go...

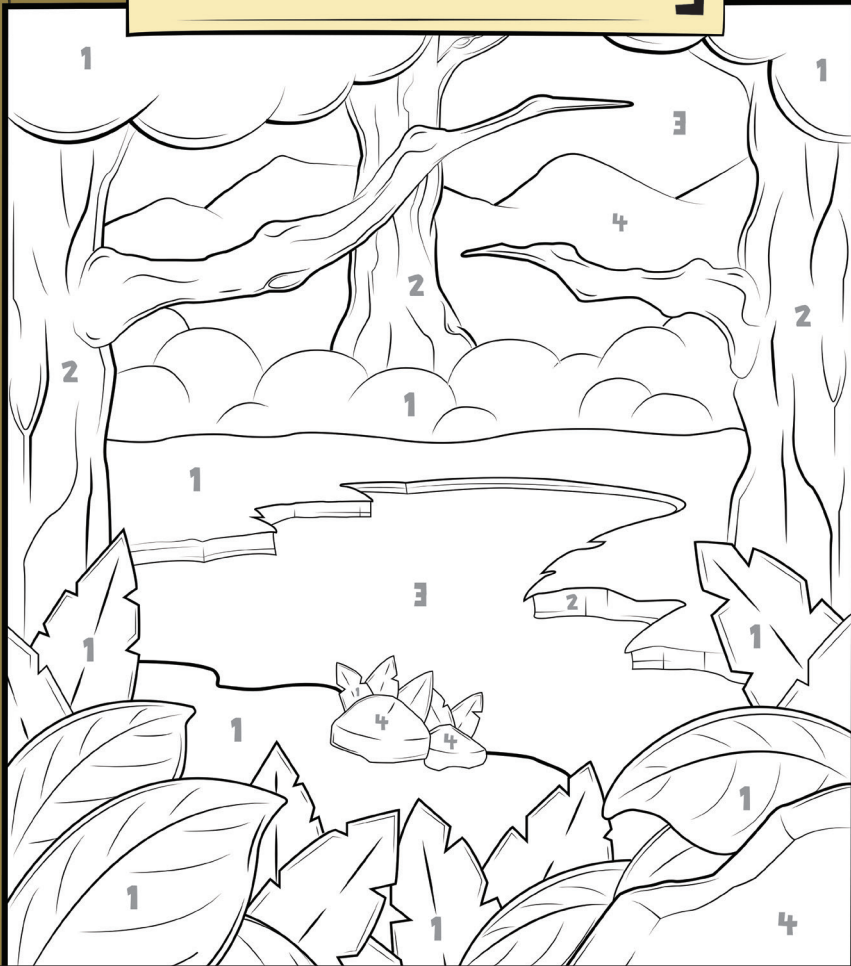

Oh no! The forest has lost all its color. The last time I was here it was bright and green.

Will you help me bring it back to life?

Color by Numbers Activity

Use the color next to the number and color the areas with the number in it, using the matching color. Why do you think the forest has lost its color? Before we know it, there might not be any forests left. Did you see something moving in the forest? Help me find what it was...

Find the endangered Vietnamese Species

There are 5 endangered Vietnamese animals hidden in the Vietnamese forest, the Banteng; Saola; Tiger; Flying Squirrel and Vietnamese Pheasant. Can you find them? Now that you know some of the animals in Vietnam that are endangered, we need to head over to Africa and learn about one of the most endangered animals there, can you guess what animal it is?

Draw the Rhino

Yes! You've guessed right! It's the Rhino. There aren't many Rhino left in Africa and the world for that matter, because they are being killed for their horn by bad people known as poachers. There is a false belief that Rhino horns can be used for medicine in Vietnam and that people believe that Rhino horn makes them feel rich. This is not true and people must begin to help spread the message that rhino horn is needed for the Rhino's and nobody else. Would you like to draw a Rhino? Lets draw a beautiful picture.

Maze

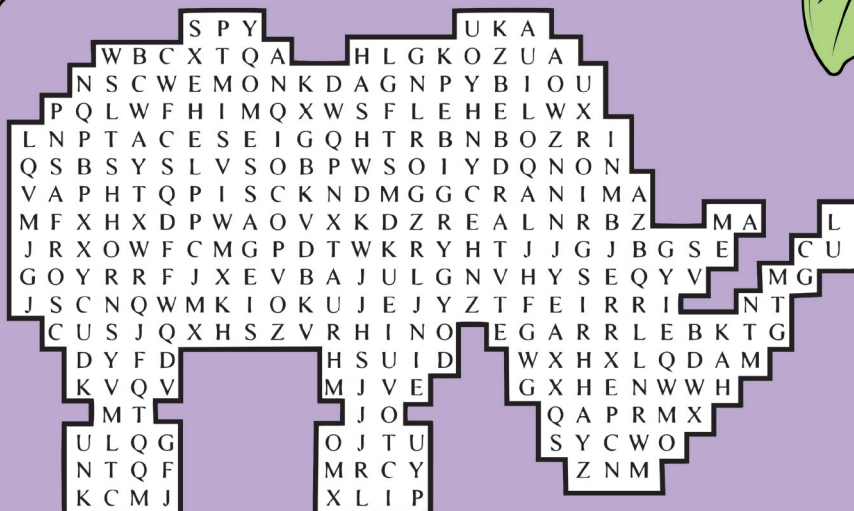

Finish

Start

Lets help the baby rhino get to his mother. Draw a line from the rhino to the finish and show him the way to his mother safely. It's so important to help keep the rhino safe from being killed because there might not be rhino left on earth if we don't all come together and help.

Here's a challenge, find the words in the word search that have to do with rhinos and our part in helping to save them.

Join the dots and see how we can make a difference in saving our animals and the planet if we all come together. It all starts by showing that we care and when we come together, we can make a great change! You can be a hero by playing your part. Rhino Ranger and all the animals thank you for being such an animal hero.
